

To deal with this criticality, the Japanese company Nissei has developed a coating called Antistatic Solar Armor 2.0: a transparent film designed to reduce the storage of solid particles on the ...

Customers in the solar and photovoltaic industry count on NOWOFLON ET for solar energy in production because the special film provides reliable protection and improved performance.

Our front sheet ETFE film provides high levels of resistance to chemicals and weathering as well as low flammability, stress crack resistance, and insulating properties in solar photovoltaic panels.

This anti-static, self-cleaning surface increases solar panel performance while minimizing ongoing maintenance by creating a micro-thin, super-slick hydrophobic surface that prevents the adhesion of ...

When it comes to maintaining the efficiency and longevity of your solar panels, one key factor to consider is antistatic coating. This specialized material is designed to prevent the buildup of static ...

The self-leveling design of Antistatic Solar Armor ensures even coverage over the surface of your solar panels, providing uniform and effective protection against contaminants.

AIT's speciality coatings provide proven UV stability, moisture barrier protection and are embedded with specially designed electrical conductivity, high dielectric strength or anti-static properties for the ...

Enhance your solar panel maintenance with Chemitek Antistatic Solar Armor, a specialized coating designed to boost efficiency and protect panels from dirt and grime.

Diamon-Fusion[®] is a versatile protective glass coating that can be used for both residential and commercial solar panel applications. So, whether you are a homeowner or building owner, Diamon ...

3M(TM) Solar Encapsulant Films are fast-cure encapsulants designed to work with PV modules. They protect against UV damage and weathering, while allowing broad band light transmission to solar ...
