

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more flexible, reliable, and sustainable energy future for ...

Argentina's Wholesale Electricity Market Administrator (CAMMESA) has published the contract template for the "AlmaGBA Storage" tender, which aims to add up to 500 MW of battery ...

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure.

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong ...

Argentina's electrochemical energy storage market is in its early stages but is poised for rapid growth, driven primarily by lithium-ion battery systems. The market is fueled by the...

Argentina's energy system, much like a overworked tango dancer, keeps stumbling when the heat is on. But here's the twist: the country is now charging toward energy storage solutions like ...

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme.

Until just a few years ago, talking about energy storage in Argentina was little more than an expression of intent. Today, that opportunity has moved beyond an abstract promise and has ...

This project presents a significant opportunity for global energy storage providers, and LondianESS breaks down the technical requirements, financial model, and strategic considerations ...

Argentina has taken a decisive step toward modernizing its power infrastructure, drawing international attention with its first large-scale battery energy storage tender.
