

Australia has a massive pipeline of grid-scale battery energy storage projects. 16.5 GW of new battery projects could arrive in the NEM in the next 3 years.

The Australian arm of France-headquartered renewable energy and storage developer Neoen has announced the start of construction of the 226 MW / 866 MWh Goyder North battery ...

Australia's clean energy transition has reached an important milestone. Five ARENA-funded large-scale battery storage system (BESS) projects, equipped with grid-forming (GFM) ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

In addition to the six projects that reached financial commitment, a further three battery storage projects commenced construction in the first quarter of 2025, with a total of 840 MW / 2.9 ...

Updated: Big battery projects currently being rolled out in Australia are more than ten times bigger than the first installed in 2017 at Hornsdale. Here are the 10 biggest.

In line with the IEA's World Energy Outlook 2025, Octopus Australia is investing in firmed renewable capacity - including large-scale batteries, hybrid solar and storage projects, flexible ...

Tesla has switched on another massive win for grid-scale energy storage, this time in Australia. The company says 444 Tesla Megapacks are now powering one of the country's largest ...

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National Electricity ...

A Landmark Acquisition in the Energy Sector Octopus Australia has officially acquired the Hanworth Battery Energy Storage System (BESS) from the Victoria-based developer Enervest. This ...
