

In fact, BESS capacity is anticipated to grow across all major U.S. power markets, with the Electric Reliability Council of Texas (ERCOT) expected to lead this growth since they account for ...

Canadian Solar and Sunraycer have announced two new battery energy storage projects totaling 503 MWh in Texas, supporting ERCOT's grid reliability and advancing renewable integration. ...

The Electric Reliability Council of Texas (ERCOT) has become the fastest-growing market for battery energy storage systems (BESS) in the US, adding more than 10 gigawatts (GW) since ...

Over the summer of 2024, Gridworks completed the engineering, procurement, and construction for three of Plus Power's most recent standalone battery energy storage projects ...

In the past year, ERCOT has deployed much needed energy capacity, with the help of low cost and ERCOT's open access policies, outpacing increasing demand and quickly providing the resources ...

With over 7GW of large-scale battery energy storage systems (BESS) online in Texas, where system operator ERCOT runs the grid, the state is the second biggest storage market in the ...

The Electric Reliability Council of Texas (ERCOT) is undergoing a transformative shift, with battery energy storage systems (BESS) emerging as a pivotal component of the state's energy mix.

ERCOT Annual Buildout Report: Battery capacity reaches 14 GW entering 2026 Texas begins 2026 with 13.9 GW and 22.9 GWh of commercially operational grid-scale BESS capacity. This represents a ...

The Battery Energy Storage initiative addresses integration of battery Energy Storage Resources into the ERCOT System. This section contains work products from the Battery Energy Storage Task ...

These projects both strengthen the reliability of the ERCOT grid and underscore the critical role of battery storage in supporting the clean energy transition. Together with e-STORAGE, we're ...
