

Swiss electric utility BKW AG (SWX:BWK) on Tuesday unveiled plans to install six solar photovoltaic (PV) parks totalling 70 MW in the alpine region of Berne, at the heart of Switzerland.

Berne just passed a law that paves the way for industrial-scale solar facilities to plant their roots in the town, while ensuring that the privilege won't be abused with restrictions surrounding land use.

That's essentially what the Berne Integrated Energy Storage Project aims to achieve - but instead of chewing through AA batteries like your TV remote, we're talking about storing enough ...

To allow Town of Berne residents, landowners, farms, and government to take advantage of solar energy resources in a way that is consistent with the nature and character of the Town in accordance ...

Solar facility proposals are almost always controversial in the Hilltowns, where many residents are concerned about preserving rural character. In Berne, there's the added fuel of long ...

Solar energy, being a clean energy source, drastically reduces the emission of these pollutants, leading to improved air quality and healthier communities. The adoption of solar power ...

This map shows the general location of the two solar projects proposed in Berne relative to the Berne-Knox-Westerlo School District, which is about half a mile from each of them.

BKW utility has announced plans to build 6 solar PV parks in Berne, Switzerland, producing up to 100GWh of clean energy each year and enough electricity to power 20,000 homes.

Ever wondered how cities like Berne plan to keep lights on during winter peaks while phasing out fossil fuels? Enter the Berne Electrochemical Energy Storage Project - a game-changer ...

Solar energy technologies and power plants do not produce air pollution or greenhouse gases when operating. Using solar energy can have a positive, indirect effect on the environment when solar ...
