

In the long run, investing in PV panel recycling can not only be environmentally sustainable but also economically viable as the recovered materials can offset the costs associated with decommissioning and ...

The mobile scaffold with Solar lift for lifting solar panels. Developed for simple and safe hoisting of solar panels.

This model is designed for light works and for lifting solar panels onto roofs and terraces. Driving group wheels enable a fast and easy placement in any installation. Its modular design permits to be transported in a van.

Optimise solar panel logistics with ergonomic, single-person lifts for inspection, order picking & container unloading.

The 3S LIFT Ladder Hoist System is a portable solution for lifting heavy & oversized materials, like CMU/Ballast Block and Solar Panels/Modules, vertically to the rooftop hands-free.

Capable of lifting heavier solar equipment and materials--up to a ton in weight--and reaching heights of up to 700 feet, this hoist is engineered to handle the demands of larger-scale solar installations.

GEDA Solarlift is a reliable device on every construction site to transport and assemble solar panels and photovoltaic systems securely. The solarlift also comes with an extra post that supports the ladder ...

The Solmetric Module Lift is designed to help you safely and quickly transport a solar PV module on to a roof. The system uses your existing Werner or Louisville fiberglass extension ladder.

Rubber-tyred gantry cranes comprehensively address all lifting requirements in photovoltaic projects. They reliably handle everything from large photovoltaic racks and load-bearing steel beams to ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.
