

Carbon steel solar photovoltaic bracket application

In recent years, solar industry have become the world's leading edge. Inter-Tech creates new possibilities for solar C-type bracket with its unique sheet metal processing technology.

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel ...

Through precise design, our brackets are not only structurally stable, but also perform well when carrying solar panels, avoiding deformation or shaking caused by external forces.

Photovoltaic brackets are essential components for securely mounting solar panels, ensuring stable and reliable installations. Designed for durability and precision, these brackets are engineered to ...

Solar bracket is a special bracket designed for placing, installing and fixing solar panels in the PV power generation system. The power output of the entire PV power generation system will be affected by ...

As we approach Q2 2025, the solar industry's racing to adopt C-type steel photovoltaic brackets - and for good reason. Let's unpack what makes these unassuming components so critical to your solar ROI.

Built with heavy-duty carbon steel, these brackets are engineered to endure extreme weather events, including high winds (up to 150 km/h) and severe storms. Their robust construction ensures solar ...

C-channel steel is a versatile, economical, and reliable material for solar bracket systems. Its structural efficiency, corrosion resistance, and ease of installation make it a top choice for ground ...

The use of carbon steel materials can effectively improve the load-bearing capacity and stability of solar mounting brackets, and can also reduce the manufacturing cost. In the ...

Made from high-quality aluminum, this solar bracket is designed to withstand harsh weather conditions and provide long-lasting support for your photovoltaic system. The ground mounting structure ...
