

The initiative is set to become one of the largest battery energy storage system (BESS) developments in Chile. The project is located in María Elena, in the Antofagasta Region--an area ...

In María Elena, Antofagasta Region, Generadora Metropolitana --owned by AME and EDF power solutions Chile-- officially began construction of Dune Plus, one of the largest energy ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).

Australia-based power producer Pacific Hydro has secured environmental approval for a 190.7-MWp solar project with a 200-MW battery energy storage system (BESS) in Chile, the ...

The principal component is a 440MW battery energy storage system.

In parallel, the company is advancing other solar-plus-storage developments. One of them is in Chile's Biobío Region, in the country's centre-south, where construction has already begun ...

A joint venture (JV) between EDF and developer AME has begun construction of large-scale battery and solar photovoltaic (PV) projects in Chile, with 2GWh storage capacity.

The project aims to support the integration of large-scale solar projects into the Chilean grid, helping to reduce CO2 emissions in the region. BESS (battery storage system) technology will ...

The Gabriela Phase IV project at Oasis de Atacama in Chile was energised by Grenergy, adding 272 MW solar and 1.1 GWh of storage, and was later sold to CVC DIF.

Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale standalone energy ...
