

On September 26, the largest V2G (Vehicle to Grid) microgrid in the country was inaugurated at the GAC Aion Park, coinciding with the launch of GAC's 20,000th charging pile.

In Xuzhou, Jiangsu Province, a new energy vehicle industrial park features a 52,000-square-meter array of photovoltaic panels integrated with an energy storage system, forming a self ...

The Dongao Island megawatt-level independent smart microgrid project was China's first megawatt-level microgrid system with complementary wind, solar, diesel, and energy storage, and ...

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network.

NANJING, March 26 -- A microgrid project, noted as the largest of its kind in Jiangsu Province, commenced operations recently, exemplifying the nation's push towards expanding ...

Construction of the first 107MW/428MWh phase of the project, which the Alliance said will become China's largest user-side energy storage project, began in Sichuan province on July 30.

Located in the city of Suqian and occupying roughly 3,400 square meters, the microgrid integrates wind, solar, storage and charging in infrastructure into a single, seamless system. It ...

Sprawling across the park's rooftops are 52,000 square meters of photovoltaic panels, supported by an energy storage system. Together, they form a self-sufficient microgrid that ...

Tencent, one of China's largest technology companies, has commissioned a new microgrid at its High-Tech Cloud Data Center in Tianjin.
