

CHINT delivers a one-stop solution for utility-scale battery energy storage systems (BESS), combining reliable components with smart system integration.

CHINT's energy storage system has been widely recognized for its exceptional performance and reliability, as well as its ability to seamlessly integrate with solar power systems.

Chint Energy's storage systems leverage cutting-edge technologies, including lithium-ion batteries, that provide higher energy densities and longer life spans compared to conventional batteries.

Chint Power Systems operates with two R&D centers and five production facilities worldwide, focusing on the international and local renewable energy sectors (photovoltaics and energy storage). The ...

The new all-in-one CPS ESS solution integrates the proven bi-directional energy storage inverter with state-of-the-art LFP energy storage modules. Compact design and parallel capabilities minimize ...

The Chint CPS ESSR range from Muller Energy is built for professionals. Competitive pricing, full warranty support, and simple installation. No headaches, just solid returns. Available from 10kWh to ...

Best in class cost leadership driven by value engineering and world class supply chain efficiency.

Fully integrated system with minimum on-site installation and commission efforts High energy density: 4.179 MWh in one 20 ft container, 2 MW PCS skid in one 20 ft container Modular design reduces ...

Battery Energy Storage System Key Features Fully integrated system with minimum on-site installation and commission efforts; High energy density: 5 MWh in one 20ft container Multiple-point electrical ...

Our company strengthens the innovation of solar storage related products, provides more valuable solutions, and promotes the development of my country's photovoltaic + energy storage industry.
