

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system. [pdf]

With advanced lithium-ion battery technology and intelligent control system, our eBESS battery container offers a scalable and modular energy storage solution that is easily expandable as energy demands increase.

As Conakry strives to meet its growing energy demands, energy storage batteries have emerged as a game-changer. This article explores how advanced battery systems are transforming power reliability, supporting ...

A recent project in Kaloum district combined solar panels with 2.4MWh battery storage, reducing diesel generator use by 73%. The system paid for itself in 18 months through fuel savings and reduced ...

Headquartered in Shanghai with 50,000m<sup>2</sup>+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating temperatures with 40% ...

Handover of the system took place at our site in Hombourg, with a charge simulation and a well-documented manual. This was enough for the solution to be set up in Conakry, in Guinea. Delivery of the Fix-Watt#174;, a ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs have reduced ...

Next-generation thermal management systems maintain optimal operating temperatures with 40% less energy consumption, extending battery lifespan to 15+ years. Standardized plug-and-play designs have reduced ...
