

Discount on Fast Charging of Photovoltaic Containers for Wastewater Treatment Plants

Discover how WTYEA solar-powered water treatment plants deliver zero-carbon, low-cost, and sustainable water solutions for safe drinking and wastewater treatment.

The city, in partnership with Veolia, embarked on a groundbreaking solar energy project that would power the entire treatment plant and all but eliminate GHG production.

Installing floating photovoltaic solar panels on a water reservoir provides Kelseyville Wastewater Treatment Plant with low-cost, clean energy, reduces algae growth, minimizes bank...

Completed in July 2022, the solar projects provide significant financial savings and cleaner energy for the multiple small communities served by the wastewater treatment facility.

Around the time of the inception of the Town of Silver City's Office of Sustainability, an opportunity became available to decrease the Town's wastewater treatment costs significantly through the installation of a ...

Solar power is transforming this equation. By harnessing sunlight, treatment facilities can reduce their energy costs by up to 95%, directing those savings back into infrastructure improvements, saving ...

In this work, the economic profitability and environmental utility of installing the grid-connected photovoltaic system in wastewater treatment plant were studied.

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new ...

On this episode of Growing Impact, I speak with Christine Kirchhoff, Kim Van Meter, and Hannah Wiseman, three researchers who aim to develop a database of wastewater treatment plans that are using ...

The transition to solar energy presents a practical and sustainable solution for WWTPs to reduce their dependence on grid electricity, cut operational costs, and improve the resilience of their critical infrastructure.
