

The EDGE 5 is a Micro Data Centre all in one rack, enabling localised computing to take place. The rack is cooled via a side mounted air conditioning unit that ducts cold air to the front of the rack to cool the ...

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.

However, power, cooling, and space constraints can make it challenging to design and deploy edge data centers. We explore the variety of rack sizes and systems that are available to ...

Built-in heat exchanger and PDU SEMI S2, S8, and F47 compliant Supports up to 50kW of equipment Remote management over Ethernet More info

Wall-mounted cabinets provide networking/server capacity when floor-space isn't an option in a variety of indoor and outdoor environments, designed with both installation and daily-use in mind

Managing the cooling and power requirements of a 50kW rack density AI data center presents a unique set of challenges. In this blog post, we will explore effective strategies and cutting ...

EdgeBLOK MDC - Micro Data Center EdgeBLOK MDC - Micro Data Center solution is a package that provides power, cooling, monitoring, security and essential accessories into a single cabinet.

Legrand can best meet the needs of your space and budget through one vendor wherever your edge deployment is, with the resources and people to support it. Legrand's line of full-size to wall-mount ...

Modular and scalable immersive tanks up to 50kW per tank, best suit for growing business models. Intelligent controller, rich in information, easy to monitor and debug.

Edge computing does not require a special type of data center; there is no typical edge data center. In many cases, a very small data center is sufficient - one or just a few racks with a connected load of ...
