

How many electric cars are there in Namibia?

Currently, Namibia has approximately 100 electric vehicles on the road, with the Nissan Leaf dominating the market. To support EV adoption, the country is actively working on setting up charging stations nationwide. M&Z, a major player in the automotive industry, has already launched a fast-charging station with a capacity of 60kW/h.

How many electric vehicles will Namibia have by 2025?

Namibia has set ambitious targets for a greener transportation system, aiming to have 96,500 light vehicles converted to battery electric vehicles (BEVs) by 2025. The Electricity Control Board (ECB) has approved a regulatory framework to govern the installation and operation of electric vehicle (EV) charging infrastructure in Namibia.

Could infrastructure challenges hinder EV adoption in Namibia?

The regulatory framework comes as Namibia seeks to expand its EV market, aligning with global trends toward sustainable energy solutions. However, analysts warn that infrastructure challenges could hinder widespread EV adoption.

Will m&z start a fast-charging station in Namibia?

M&Z, a major player in the automotive industry, has already launched a fast-charging station with a capacity of 60kW/h. Namibia has set ambitious targets for a greener transportation system, aiming to have 96,500 light vehicles converted to battery electric vehicles (BEVs) by 2025.

The Electricity Control Board (ECB) has approved a regulatory framework to govern the installation and operation of electric vehicle (EV) charging infrastructure in Namibia.
