

The 127 MW/254 MWh Scornicesti project is one of the largest energy storage assets in Romania to have secured an optimisation contract. Under the agreement, GEN-I will act as the ...

As Romania aims to achieve 24% renewable energy penetration by 2030, the Bucharest compressed air energy storage (CAES) project emerges as a critical solution. Imagine storing excess wind power at ...

Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists "developing storage capacities" as an instrument to improve ...

This exploration delves into Romania's strategic position within the broader European energy transition, unpacking the obstacles it faces and the innovative approaches driving change. By ...

Romania enters 2026 with renewed momentum across its solar and energy-storage markets -- but also with a sharper sense of discipline. The era of inflated pipelines and speculative ...

GEN-I and R.Power have signed a long-term optimisation agreement for the Scornicesti battery energy storage system (BESS), one of the largest utility-scale storage projects currently ...

The largest battery energy storage capacity in Romania - 200 MW power and 400 MWh capacity - was operationalized on Friday, Minister of Energy, Bogdan Ivan announced.

Why Bucharest's Energy Storage Harness Matters Now More Than Ever Let's face it - when you think of cutting-edge energy tech, Romania might not be the first country that springs to mind. But here's the ...

Why Energy Storage Chassis Matters in 2024 As Bucharest aims to achieve 35% renewable energy integration by 2026, the energy storage chassis has emerged as the unsung hero. You know, it's not ...

Privately held MASS Group Holding plans to invest more than EUR1 billion (~\$1.18 billion) in large-scale battery energy storage projects in Romania after reaching an agreement with the ...
