

In a word, our 60KW mobile energy storage EV charging pile combines functionality, convenience and reliability, aiming to be a great helper for your electric vehicle charging.

Featuring automatic power-off upon full charge or no-load, overload protection, and compatibility with new and old vehicle models, it includes AC contactors for reduced power consumption and a DC ...

With the concept of modular design, it can be flexibly configured into 60kW, 80kW, 100kW and 120kW and other power outputs to meet the requirements of charging EVs with different capacities, and it's a ...

This high-quality charging pile is a powerful and efficient solution for electric vehicle charging needs, Our Custom 60kw DC Charging Pile offers a high charging power of 60kw, ensuring fast and reliable ...

The 60kw/90kw integrated DC charging pile integrates the charging pile, charging interface, human-computer interaction interface, communication, billing, and other parts into a whole.

Operating at an input rating of 400v 3ph 125A, this charging pile offers a maximum output power of 60KW within a voltage range of 200V-750V DC. With features including overcurrent protection, surge ...

The integrated photovoltaic storage and charging cabinet is a car charging product with high integration, integrated photovoltaic storage and charging, intelligent power distribution, reduced charging pile ...

The 60kw single-gun intelligent charging pile is suitable for electric vehicle charging, with multiple interface options such as CCS1, CCS2, Chademo, and GB/T, and a maximum output power of 60kw.

Juhang Energy Technology Group Co., Ltd. (referred to as: juhang Group), is an industry lead-ing electrical and power electronic product designer and manufacturer.Juhang Group provide ...

New DC pile power level in 2016-2019 Source: China Electric Vehicle Charging Technology and Industry Alliance, independent research and drawing by iResearch Institute.
