

When available, pumped hydro dominates the storage mix, reducing the need for new battery and hydrogen storage installations. Overall, short-term battery storage best captures solar ...

Copenhagen, Denmark, 2nd of February, 2026 - European Energy has inaugurated Northern Europe's largest combined solar and battery park in Kvosted, Denmark. The hybrid asset ...

The European Commission says it will introduce an energy storage package in 2025, as outlined in a new report on progress by member states toward 2030 clean energy targets.

New report: European battery storage grows 15% in 2024, EU energy storage action plan needed Press Release 7 May 2025 MUNICH, Germany (Wednesday 7th May 2025): New analysis ...

The Energy Storage Coalition, brought together by prominent European trade groups for solar, energy storage and wind, together with Breakthrough Institute, assesses that four countries ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

The European industry body is having a major push on the benefits of co-locating solar with wind power and energy storage, or both, and will include storage advocacy in its future contact ...

The transition to renewable energy stands at a critical juncture, with modern energy storage solutions emerging as the key to unlocking their full potential. As European nations push ...

As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage Coalition urges the European ...

Walburga Hemetsberger, CEO of SolarPower Europe said: "With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at ...
