

China's exports of batteries and battery energy storage systems (BESS) have hit a record in 2025, soaring by 24% from the year before over the first nine months of the year.

China's dominance in energy storage is set to reach new heights, with global shipments of lithium-ion battery cells for energy storage expected to surge by 75% this year, driven by domestic ...

Discover how China's battery giants are conquering global markets with a 220% export surge, amid overcapacity and U.S. tariffs. Explore the booming energy storage revolution and its ...

The export volume of energy storage batteries has experienced a remarkable increase of 170%. This surge is attributed to several factors including trade policies, market demand, and ...

The United States is still the largest overseas market for China's lithium-ion batteries, making up a quarter of the country's more than \$60 billion in exports last year, according to customs ...

China's sweeping reforms to its electricity market are rapidly transforming the economics of energy storage, driving a surge in both domestic deployment and global exports of battery...

After last year's severe overcapacity slump, Chinese battery firms secured about 200 overseas orders totaling 186 GWh in H1 2025.

The country's lithium-ion battery exports reached an unprecedented \$7.6 billion monthly by August 2025, marking a substantial 23% year-over-year increase that signals China's growing ...

Given the leading position of Chinese companies in the global lithium battery market, the significant increase in China's energy storage battery exports in the first five months of the year is ...

According to Reuters, China's lithium-ion battery exports reached record levels in the first ten months of 2025, driven largely by surging demand for stationary energy storage systems, official ...
