Why do we need a consolidated bundle of folded containers?

Simple and effective consolidation of a bundle of folded containers in order to have a safe handling process. Specific technical features. Robustness for damages, particularly in terms of robustness to the folding and unfolding process. The larger the risk for damage, the more vulnerable the system is;

Are foldable containers a viable alternative to empty containers?

However, due to trade imbalances transport movements of empty containers remain to some extent unavoidable. Therefore, foldable containers seem an attractive option from the point of view of saving transport costs as well as handling and storage costs. So far, however, these containers have not been introduced successfully.

What are logical concepts for the application of foldable containers?

Logistic concepts for the application of foldable containers Type of network: ranging from point-to-point relations (concept I) to a fine-meshed network (concept IV). This implies different requirements regarding the transport volumes. containers (in size and direction) to be of an order that facilitates the necessary bundling.

Do Empty shipping containers clog roads and ports?

Empty shipping containers clog roads and ports. Staxxon's foldable containers -- which can be stacked in bundles -- are one solution to this.

Corrugated Foldable Container House Innovative folding container designed for modern office and workspace solutions.

A five-in-one foldable container design could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS).

Furthermore, we developed an integer programming model to analyze through experiments the effect of foldable containers in each situation. The results show that foldable con ...

Traditional shipping containers contribute to these problems, as a considerable percentage of them travel empty. Enter foldable shipping containers--a revolutionary solution that ...

Empty shipping containers clog roads and ports. Staxxon's foldable containers -- which can be stacked in bundles -- are one solution to this.

This study seeks to explore the effectiveness of employing foldable containers (FLDs) in liner shipping to reduce relocation and the empty containers and bunker costs (BCs) associated with ...

We analyze the effects of foldable containers using a newly developed multi-port and multi-period container planning model. The proposed model is a large-scale optimization problem, for ...
