

That's exactly what CATL's EnerC flow battery storage is achieving across Deutsche Telekom's network. Forget what you knew about traditional power solutions - we're talking about a system that laughs in ...

Picture this: Germany's iconic telecom towers, those steel skeletons dotting the countryside, suddenly becoming self-sustaining energy hubs. That's exactly what CATL's EnerC flow battery storage is ...

The first of its kind, this study offers an overview of the photovoltaics and battery storage market in Germany. It provides the latest statistics on the PV market and battery storage systems, along with ...

Energy storage can help solar operators manage revenue losses by storing excess generation during peak hours and selling electricity when market prices are more favorable. At Re ...

The official assessment, published by Germany's network operators and the Bundesnetzagentur (available here), lays out the technical reality and provides the groundwork for ...

Germany's grid connection requests for battery storage exceed 500 GW, a figure driven by a "first come, first served" approval system rather than viable projects, according to...

To date, it has seen only bids for solar PV and battery projects, but for the first time in the latest round, wind projects combined with energy storage received bids. However, none were ...

This upward trend is likely to continue, especially since solar energy is expanding more rapidly thanks to accelerated approval processes. According to the Federal Network Agency, photovoltaic systems ...

BDEW found that there are currently pending grid connection applications for large battery storage systems (≥ 1 MW) totaling more than 720 GW. Grid connections for an additional 78 ...

The handling and permissibility of construction cost subsidies has been controversial in practice to date and is the subject of ongoing legal proceedings at the Federal Court of Justice (BGH) ...
