

To strengthen grid stability, the government will upgrade the SCADA system and deploy 200MW of battery energy storage capacity by 2030 at critical grid locations.

Ghana - Africa's largest gold producer - is modernizing its electricity grid to ensure reliable power supplies for mining companies as part of a broader strategy to maximize growth ...

If you are a researcher developing smart grid algorithms, an electricity provider, a donor funding electrification projects, or otherwise involved in this field, we invite you to share your ...

Memphis Light, Gas and Water (MLGW) is taking a major step toward grid modernization with the deployment of a dedicated private 5G wireless network across Memphis and Shelby County in ...

Beyond the data itself, the release of the Accra Power Quality and Reliability Dataset has the potential to revolutionize energy management in Ghana. It offers decision-makers a clear path to ...

Awesense and Arthur Energy Advisors conducted their first joint grid modernization project with the Electricity Company of Ghana (ECG) to optimize critical industrial operational areas in Accra ...

This paper analyses the expansion of the electricity grid in Greater Accra and Grand Lom&#233;, based on the diversity of perceptions among residents and producers in the area.

Baku, Nov. 15, GNA - The government will commission a mini-grid on November 28, 2024, to provide electricity and boost business activities in three island communities within the Ada East Municipal ...

To address transmission constraints, losses, and associated reliability issues, it is crucial to invest in the expansion and modernization of transmission infrastructure, implement operational ...

Harness newer grid measurement technologies in the design, screening, and prioritization of power infrastructure projects. Further explore the role of voltage quality in mediating consumer outcomes.
