

Are Hanwha qcells and Trina Solar negotiating a patent agreement?

Hanwha Qcells and Trina Solar say they have signed a patent licensing and transfer agreement with each other to end a dispute over their intellectual property. Trina Solar and its South Korean rival, Hanwha Qcells, have revealed that they have reached a settlement agreement on a patent dispute that the Chinese module maker initiated in January.

Did Trina Solar infringe a patent infringement lawsuit against Hanwha qcells?

Trina Solar said in a patent infringement lawsuit against Hanwha Qcells (Qidong), a Chinese unit of Hanwha Qcells, that the South Korean company had unlawfully exported and sold solar modules that infringed upon a patent granted to the Chinese manufacturer by the China National Intellectual Property Administration in 2016.

Did Trina Solar infringe on a patent?

In late October, Hanwha Solutions filed a preliminary injunction request in which it claimed that Trina Solar (Germany) had been improperly selling solar modules in the German market. It said that the Trina Solar panels infringed upon one of its own patents for its proprietary Q.ANTUM passivation technology.

Why is Hanwha suing Trina Solar?

"The lawsuit involves the core cell technology commonly used in Hanwha's current modules produced in China and sold globally," a Trina Solar spokesperson told pv magazine at the time. "The alleged infringing products include Q.PEAK DUO BLK M-G11A+, Q.PEAK DUO M-G11 and other key products."
