

# How much does it cost to install solar panels on Iranian roofs

How much does a solar panel installation cost?

One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is \$3.04, but larger systems often have a lower cost per watt.

How much does a rooftop solar system cost?

**Mounting system:** This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. **Electrical wiring and hardware:** This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

Can solar panels be installed on a roof?

Home solar panels are generally installed on rooftops, so the system's design largely depends on the roof's characteristics. Complex roofs with multiple faces, dormers, vents, or skylights can increase installation and design labor costs, but they may also limit the number of panels you can install.

Should you install solar panels yourself?

When you install solar yourself, you don't have to pay labor costs, customer acquisition costs, or installer profit margins. However, installing solar panels is dangerous, and taking the DIY route can void your warranties and even prevent you from connecting to the grid.
