

How to install the hinge of photovoltaic bracket

Save hundreds on solar installation! Learn how to build sturdy DIY panel mounts with our step-by-step guide. Go solar without breaking the bank.

This short and efficient video showcases the entire process, from individual components step-by-step to the completed installation.

To ensure brackets are installed in a straight line, install a single ProteaBracket on each end of the roof at a measured, consistent distance from the bottom edge of the roof.

This bracket setup guide is designed specifically for installation on the rooftops of RVs, campers and other recreational vehicles. But you can install the bracket mounts on any surface as long as it is flat.

V panels. Place the MidGrab snug against the solar panel, remove peel-and-stick paper, lower the bracket feet on to the anel rib. Install the four 1" self-tapping screws and tighten the hinge nut 225 in/lb

By following these detailed guidelines, photovoltaic projects can ensure the successful installation and long-term performance of various types of photovoltaic system brackets.

*When used in conjunction with the S-5-PVKIT 2.0, an extra nut is necessary to secure ProteaBracket's slotted L-flange to the PV Standof and mounting disk.

is available from the S-5! website: This document is an installation guide only and the phot 2 illustrating installation tools and techniques, not system designs. The ProteaBracket is designed to fit most ...
