

In an interview, Ayush Mishra, Co-founder at AmpereHour Energy discuss with TimesTech, how energy storage is moving from a backup solution to a core part of power strategy for Indian ...

Indian solar manufacturer Loom Solar has launched a 125 kW/261 kWh CAML battery energy storage system (BESS) for commercial and industrial (C&I) applications. The BESS is ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy ...

Government support and competitive tariffs are driving rapid deployment, positioning energy storage as a cornerstone for renewable integration and grid reliability.

The main drivers of the expansion of industrial and commercial energy storage are examined in this article.

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

Three initiatives, regulations or policies related to decentralised energy storage have been updated or introduced by the relevant agencies at the national or state level.

India is rapidly emerging as a global hub for energy storage, driven by strong government support and a vision to achieve climate resilience and grid stability.

In 2023, the commercial and industrial (C&I) energy storage sector saw a significant uptick in installations, marking a pivotal moment with 4.77 gigawatt-hours (GWh) of energy storage capacity ...
