

Statkraft is currently building Ireland's first 4-hour duration battery storage project in County Offaly, in Ireland's midlands. Statkraft sees significant potential in co-location/hybrid assets under the ...

Construction is underway by Statkraft at Ireland's first 4-hour grid-scale battery energy storage system (BESS) in County Offaly, in Ireland's midlands. The 20MW, 4-hour BESS solution is ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage ...

Battery energy storage systems, often referred to as Bess, are regarded as a vital part of the Ireland's fledgling renewable energy sector and demand for them has never been higher.

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

The Gorman battery system, with an installed capacity of 50 MW, is our world's first commercial-scale battery system and the first in Ireland. This project is part of our commitment to promoting battery ...

Norwegian state-owned energy company Strakraft is developing a 20MW/91.2MWh battery energy storage system (BESS) project at the site of its Cushaling wind farm in County Offaly, ...

BESS and other forms of storage are a key pillar in Ireland's future electricity system, together with renewables and the back-up generation that is currently provided by natural gas, and ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...
