

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

Though it's a fairly new company, Project Solar seems to be a ...

Remind prospective customers that while tax credits, rebates, and incentives might be available for solar purchasers who qualify, offers for "free" or "no cost" solar panels are scams.

Though it's a fairly new company, Project Solar seems to be a legitimate solar panel and system dealer. By working with partner installers across the continental U.S., it offers full-service...

The Truth About the Dark Side of Rooftop Solar Panels Rampant bankruptcies in the solar panel industry have left many consumers with systems that don't work and no way to get them fixed.

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. These...

Tesla launches its own solar panel as its EV business falters Will its latest design, being built in Buffalo, New York, buck the downturn in rooftop solar -- and Tesla auto sales?

Solar panels have gotten so cheap that the plant, born of an old attempt at harnessing the power of the sun, appears to be obsolete.

The solar panel project in south Alabama would generate power to off-set energy from a data center 150 miles away in Montgomery.

A citizen-organized petition also received 600 signatures against solar projects in the township. As background, Ward explained that this came about after the trustees were "approached in late 2025 about a ...

The project behind this shift is called Terra Solar, and it's being built in the Philippines. When completed, it will bring together up to 5,000,000 solar panels in one location, something the world has never ...
