

Kehua Digital Energy, with 36 years of power electronics expertise, offers comprehensive solutions in photovoltaics, energy storage, and microgrids. With installations exceeding 46GW in PV and ...

In 2020, a Pacific island microgrid project began its first phase with a capacity of 1 MW/2 MWh, using a Kehua energy storage PCS solution. In 2024, the project was expanded by a capacity ...

As the exclusive provider of overall energy storage solutions, Kehua Hengsheng has made in-depth layout of the design and planning of this project.

Kehua's grid-forming energy storage technology has demonstrated its practicality and advancement with multiple worldwide projects.

This innovative achievement not only showcases Kehua Data's strong capabilities in energy storage technology but also injects new vitality into the development of networked energy ...

With 37 years of solid foundation in power electronics technology and the experience of developing over 4,000 new energy projects, Kehua Data holds a competitive advantage in large ...

In 2022, Kehua provided a grid-forming micro-grid solution for the power department of a Middle Eastern oil ministry, employing grid-forming energy storage combined with photovoltaic ...

Aiming at overseas application environments, Kehua Hengsheng independently developed a 1500V centralized "turnkey" system with a single system power of up to 3.6MW.

With installations exceeding 46GW in PV and 15.2GW/8.2GWh in energy storage globally, Kehua is a Tier 1 clean energy provider committed to promoting a zero-carbon future.
