

The Carbon Trust, the International Institute of Refrigeration, and ASHRAE have supported the Kigali Cooling Efficiency Program in the publication of this brief.

It is imperative to address the energy required to provide cooling. The Kigali Amendment to the Montreal Protocol addresses these needs by setting ambitious global targets to phase down refrigerants with ...

Rwanda further advanced its sustainability agenda with the approval of \$28 million for the Green City Kigali Project by the Green Climate Fund, showcasing a model for sustainable ...

Albeit quite new, the initiative had tangible results to present by the end of its first year: in addition to 27 National Cooling Plans being drafted with technical assistance of K-CEP, the program is supporting ...

Rwanda's ambitious Green City Kigali project, spanning 600 hectares, exemplifies this vision. The initiative aims to create eco-friendly neighborhoods featuring sustainable housing, ...

That's the challenge Rwanda's capital, Kigali, is tackling head-on with its groundbreaking energy storage policy. Designed for tech-savvy policymakers, sustainability investors, and curious energy nerds, this ...

If fully implemented, the Kigali Amendment will avert just under 0.5°C in global temperature rise by the end of the century. Adding energy efficiency improvements will almost double that benefit.

The Kigali Cooling Efficiency Program (K-CEP) is supporting countries, companies and communities to achieve energy efficiency objectives related to the Kigali Amendment.

The Global Scientific Assessment will assess the existing knowledge on implementing the Kigali Amendment and enhanced cooling efficiency. The objective of the assessment is to accelerate the ...

By promoting solar energy in public spaces and low-income housing, Kigali is reducing its reliance on fossil fuels and supporting the shift toward renewable energy. This commitment to ...
