

To support the green transition in Kosovo*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW.

Summary: Huawei's energy storage project in Pristina is revolutionizing Kosovo's renewable energy landscape. This article explores its technical innovations, environmental impact, and how it aligns ...

From stabilizing solar grids to keeping factories running, energy storage containers are Kosovo's silent power heroes. As renewable adoption accelerates, these systems aren't just optional--they're essential.

On behalf of the German Federal Government, KfW is supporting the construction of a large photovoltaic system with an installed capacity of up to 100 MW to promote decarbonisation. It will contribute to ...

The EIB is providing a EUR 33 million loan for KEK's solar power project of 120 MW in peak capacity on its former coal ash dump.

The EIB is providing EUR33 million for the construction of one of Kosovo's largest solar photovoltaic plants. The new plant will contribute to higher energy security and the phasing out of ...

Known as Solar4Kosovo, this new solar plant is a key component of the EU's strategy to help Kosovo expand its renewable energy capacity and reduce its reliance on coal power.

Government-controlled Kosovo Energy Corp. (KEK) said it is preparing to start building its Solar4Kosovo 1 photovoltaic plant near Prishtina. It informed the local community that agricultural ...

The "Solar 4 Kosovo II" project is one of the largest energy projects in Kosovo. This will be one of the largest solar plants in Europe and the first in the region by capacity, which will utilize clean solar ...

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.
