

Lead-acid battery energy storage foreign trade orders

U.S. import and export data on lithium-ion energy storage batteries suggest that quantity demanded increased for lithium-ion batteries and domestic production. The data also indicate continued ...

Batteries imported from China face tariff levies of nearly 150% if all trade actions now under consideration by the U.S. Congress and executive branch come to pass, Clean Energy ...

As global new energy storage foreign trade orders surge 78% year-over-year (BloombergNEF 2024), we're witnessing a silent revolution where battery packs are becoming the new oil barrels.

Tariffs and funding overhauls by the Trump administration are set ...

"Tolled lead" typically means lead that is processed or refined under a tolling agreement, where a company provides raw material (like lead ore or scrap) to a processor, who refines it for a fee and ...

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

New analysis from Clean Energy Associates (CEA) and Wood Mackenzie highlights the challenges facing the US battery storage market due to trade tariffs.

Tariff chaos reigns supreme in the development of the US stationary battery energy storage industry. Facing extraordinary tariffs of 145% on BESS imports into the country, developers ...

Tariffs and funding overhauls by the Trump administration are set to raise energy storage prices and hit short term deployment as domestic manufacturing capacity falls short.

Explore how 2025 battery tariffs affect U.S. imports, energy storage, EV production, and sourcing strategies amid rising China tariffs and trade shifts.
