

Lease and install solar photovoltaic panels

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

How much does a solar panel lease cost?

Solar panel leases cost between \$50 and \$250 per month, on average. The exact amount the homeowner pays depends on the amount of energy they use at home, the company supplying the lease, their location, and their credit score. The customer can choose between a number of financing options that best suit their needs.

Is solar leasing right for You?

Thankfully, solar leasing offered an affordable alternative, allowing people to benefit from solar energy without having to fork out thousands of dollars for the upfront cost. Fast forward to today, and this system is still helping thousands of Americans install solar panels on their property. Think solar leasing might suit you?

Should you lease solar panels?

Leased solar panels come with the main benefit of any home solar panels: reduced energy cost. Because you don't own the panels on your roof, you aren't responsible for the solar panel maintenance. The company that owns them is. They'll also be responsible for removing them at the end of the solar lease.

Think solar leasing might suit you? Before you get stuck in, let's look at whether it's a better investment than buying the panels outright.
