

What does MCs 012 mean for solar installations?

The Microgeneration Certification Scheme(MCS) has released version 3.0 of the MCS 012 standard,marking a significant shift in the certification requirements for solar mounting systems. This update aims to enhance the safety,reliability,and performance of solar installations,particularly focusing on flat roof systems. 2.

What is MCs 012?

MCS 012 is a UK certification standard set by the Microgeneration Certification Scheme (MCS) that applies to roof-integrated and building-mounted solar PV systems,specifically their interface with the building structure (such as mounting kits,flashings,and weatherproofing). Its purpose is to ensure that solar mounting products:

Who certifies the MCS?

The MCS is certified by the Department for Business,Energy &Industrial Strategy(BEIS) - UK. The Microgeneration Certification Scheme (MCS) published in May 2023 a new MCS 012 Solar Mounting Standard. The new Standard ISSUE 3.0 is a significant update to the previous ISSUE 2.4.

What is the scope of the MCS standard?

The scope of the Standard includes: All MCS certified installation companies should be using MCS 012 approved products. Additionally,many of the Standard requirements also apply in building regulations,which is another reason for using approved products.

Kiwa UK conducts MCS product certification for various solar technologies: collectors (MCS 004), PV modules (MCS 005), Pitched roof installations (MCS 012) and Bespoke Building Integrated PV ...

This is the Solar Mounting Product Standard standard page from the MCS Certified website. Visit our website to view details of this standard.

The MCS has released version 3.0 of the MCS 012 standard, a big shift in the certification requirements for solar mounting systems. Find out more.

The new certificates add to a long history of MCS certificates for Renusol products including roof attachments, rails and clamps. The MCS 012 certification is part of the Microgeneration ...

This certificate authorizes the manufacturer or their authorized representative to apply the MCS Approved Product Mark to the range of products listed within this certification in accordance ...

A decade ago,photovoltaic (PV) lighting options were either cumbersome commercial systems or small novelty items of little interest to the broader lighting market. Now,with new technologies ...
