

NMP Series Features: NMP family is a 1U low profile and configurable type power supply from MEAN WELL. This family comprises two power wattage for the line-up, 650W and 1200W, and ...

This video shares detailed introductions to NMP series which has several key features specifically designed for Industrial applications. Please take a quick look at it!

In a smaller size and with multiple DC outputs (up to 240W), the NMP power supplies are perfect for various components, such as lifting motors, air compressors, water pumps, dental resin ...

The NMP series is a medical grade modular power supply, specifically designed for systems that require multiple DC voltages and have limitations in space. Front-end include 650W and 1200W models and will pair ...

NMP Series Features: NMP family is a 1U low profile and configurable type power supply from MEAN WELL. This family comprises two power wattage for the line-up, 650W and 1200W, and the output ...

The UMP series has a special slim, fan-less design that can provide up to 400 watts of output power with up to 4 rails of output voltage provided. It can also be used as a single rail power ...

With options for 5V, 12V, 24V, 48V, and Dual Output, the NMP series delivers up to 240W per module, powering everything from medical devices to factory automation systems.

?Multiple Protection?The power converter works in the range of -30?~+70?, with short circuit, overload, over-voltage and over-temperature protection to protect your equipment.

The MEAN WELL Modular Power Supply NMP-650/1K2 and UMP series provide the solution to this application because they supply multiple voltages in a single unit and low Earth ...

Mouser offers inventory, pricing, & datasheets for MEAN WELL NMP Series Modular Power Supplies.

SDP series industrial UPS NMP series industrial-grade UPS SMP series industrial-grade smart UPS MPR series dedicated modular and redundant UPS for power transmission and transformation HDP ...
