

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Solar container systems provide portable, scalable energy sources that reduce reliance on traditional grid infrastructure.

The IRA has the potential to greatly expand solar and energy storage manufacturing in the United States. For energy storage, the IRA offers incentives to produce electrode active materials, battery cells, and battery ...

We've built a better battery. At Natron Energy, we're changing the way the world looks at critical power and industrial batteries for high-powered applications like AI, data centers, peak shaving, and power quality ...

Generate and store renewable energy with a solar and battery storage system at your facility to reduce energy costs, earn incentive payments, and improve corporate sustainability and resilience.

Built, tested and optimized for the North American market for commercial projects. Equipped with integration controls for solar PV and generators. Backup power-ready and designed to support onsite load during grid ...

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry solutions, ...

North America's energy storage industry is rapidly evolving, with solar and battery storage solutions becoming a central pillar in the continent's shift toward renewable energy systems.

Klaus Faber AG has launched the compact solar battery container Mobile Power System. This intelligent overall solution combines a 24kW solar system with 80kWh lithium-ion battery storage and an ...
