

Photovoltaic bracket profile stacking production line

The full photovoltaic bracket production device realizes the full production processes of plate loading, automatic feeding, twice punching, guiding, forming, correcting and tracking cutoff.

It has a production scale of 1000MW photovoltaic roof brackets and 1200MW photovoltaic ground brackets. We use advanced technology and innovative design to provide

?Watch the full commissioning of Zhongtuo"s fully automatic Solar PV Bracket Production Line exported to the USA ?? ?From double-head decoiling to automatic stacking and packing ...

The present invention relates to a profile production line, in particular to an automatic production line for processing profiles for photovoltaic component frames.

This equipment is mainly used for punching and manufacturing of photovoltaic brackets (C-shaped steel, U-shaped steel).

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum ...

Fully Automatic C Profile Solar Photovoltaic Bracket Production Line Strut Channel Roll Forming Machine

Three packaging methods for PV modules: a) Landscape vertical packaging is recognized as optimal; b) Horizontal stacking has been eliminated; c) Portrait vertical packaging is applied for larger PV modules.

The fabrication process of photovoltaic brackets follows a precision-engineered workflow on the production line, encompassing decoiling, flattening, precision punching, roll forming, and cut-to ...
