

PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels. But an emerging problem in the U.S. solar business that...

"I would not say that we're expecting a collapse in the residential solar industry," said Z&#246;e Gaston, principal analyst at Wood Mackenzie, a data analytics firm. "We are expecting a...

Meanwhile, my solar panels have been sitting on my roof for four months, entirely unused, taunting me from above. Over another summer of record-breaking heat, my electricity bills were...

With money no longer cheap, subsidies a matter of politics and swirling allegations of fraud, a collapse could be coming soon.

Residential solar is on a downturn, and things may get worse. In a shock for the industry, the latest draft of the "One Big Beautiful Bill Act" excludes residential solar lease providers from the ...

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital injections, ...

Residential solar is on a downturn, and things may get worse. In a shock for the industry, the latest draft of the "One Big Beautiful Bill Act" excludes residential solar lease providers from the Investment ...

Let's face it - nobody installs photovoltaic panels expecting to find them collapsed like a house of cards after a heavy snowfall. Yet here we are, staring at twisted aluminum frames and shattered silicon cells buried under ...

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many states if...

While stronger players demonstrate some resilience, impacted homeowners and solar employees face prolonged uncertainty. The outright collapse of many once fast-growing solar firms provides ...
