

The US manufacturer First Solar plans to build a new 3.7 GW factory, aimed at pushing more CdTe solar cell technology into the US market.

First Solar, the US's largest solar panel manufacturer, has now announced the location of its new solar factory. The company says it will build a new facility in Gaffney, South Carolina, to...

According to PV Magazine, First Solar will build a 1-million-square-foot manufacturing facility in Gaffney to produce its innovative Series 7 thin-film solar modules.

"With the successful commencement of module production at the Cartersville factory, Hanwha Qcells' solar integrated production complex, Solar Hub, is taking shape at a steady pace," ...

The plant's production capacity will start at 3 gigawatts (GW) annually, with construction scheduled for this fall. Enel expects the first solar panels to be ready for the market by late-2024, and ...

Construction has been underway since late 2025, with initial production scheduled to begin in late 2026 and a full ramp-up expected during the first half of 2027. While the exact location ...

First Solar, the largest fully vertically integrated solar manufacturer in the Western Hemisphere, recently inaugurated its new \$1.1 billion solar panel manufacturing facility in Lawrence ...

This guide covers what actually matters when building a solar panel manufacturing facility: space requirements, infrastructure needs, equipment selection criteria, and realistic timelines from ...

American solar panels manufacturer First Solar has broken ground on its previously announced \$1.1bn photovoltaic (PV) solar modules manufacturing facility in Louisiana, US. The ...

Production is expected to launch at the end of 2026 and ramp up through the first half of 2027, First Solar said in a conference call with investors after it released its Q3 financial report. The...
