

As a trusted PVD equipment manufacturer, Semicore Equipment, Inc. provides reliable coating machines and vacuum systems that meet the complex needs of high-tech industries.

VON ARDENNE provides reliable PVD coating equipment, key components, and technological expertise for every stage of thin-film photovoltaics production. Our laboratory and pilot systems utilize the same ...

Central to this growth are the companies producing PV cell coating and deposition machines, which are critical for enhancing solar panel efficiency and durability.

Vacuum plays a key role in future-proofing solar panel manufacturing. It is used from the first moment to create the silicon that makes up each cell, right up to laminating the final layers together.

We provide PVD and ALD coating equipment designed for the solar industry, suitable for various materials like flexible stainless steel, glass, silicon, and ITO (indium tin oxide).

The CIGS solar cells coating machine delivers industry-leading performance for rigid substrate solar cell manufacturing. Its precise deposition control, advanced process monitoring, and scalability make it ...

With the production equipment SINGULUS TECHNOLOGIES improves cell efficiency and reduces manufacturing costs for high-performance solar cells.

Explore how vacuum tech supports PVD & CVD in solar cell production--ensuring durable coatings, efficient thin-film deposition & enhanced panel performance.

We offer highly productive vacuum coating equipment and expertise for the production of solar cells or solar modules at low cost per watt.

IKS PVD offers solar power panels and photovoltaic products pvd coating equipment. As one of leading manufacturers and suppliers in China, we also offer customized service.
