

Second Meeting of the Cross-Sectoral Accelerator for the Development of the...

As far as investments in nuclear power generation are concerned, currently, the most advanced project is being developed by PEJ (owned by the State Treasury) to build an electricity power plant at the ...

According to Section 3.2.1 of the Capacity Market Rules, Polskie Sieci Elektroenergetyczne S.A has published a detailed schedule of certification for additional auctions for each quarter of 2027.... Read ...

Poland's power sector faces significant economic- and policy-driven shifts that could see emissions fall 60-86% over 2021-2030. This report presents three BNEF scenarios for the development of Poland's ...

We engage in actions and projects thanks to which the Polish electrical power industry can better meet the challenges related to European integration, ensuring power supply safety, ...

This enhanced connectivity facilitates distributed energy sources, such as residential solar panels or community wind projects, to contribute surplus power to the grid, empowering ...

The new report by Forum Energii, titled "Polish Grids 2040," outlines solutions to support further integration of renewable energy sources and energy storage into the power system.

In extreme weather, photovoltaic and wind power generation are insufficient. When the vanadium battery energy storage is exhausted, the system sends a signal to automatically start the diesel / gasoline ...

This paper details the modifications made to the mathematical model of the Polish electrical grid created by Dr. Korab for performing optimal power flow analysis of the Polish grid.

The database of power plants in Poland is open access - we encourage you to explore and draw your conclusions. Below are visualisations of selected information from the database.
