Think Microgrid (2022) ranked microgrid state policies based on microgrid deployment, policy environment, resilience effort, grid services, and equity initiatives.

Increased Reliability and Resilience
Economic Opportunity
Clean Energy Development
Enhanced Cybersecurity
Powering Remote Communities
In some areas of the country, geography, population and economics restricts access to a larger power grid. This is especially true for island or rural communities, such as many in Alaska, which have historically been dependent on the periodic delivery of liquid fuels for heating and electricity needs. These communities sometimes pay up to 10 times ...
