

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are ...

Therefore, the percentage of solar consumed in each state may vary from its percentage of net generation. Some of the increase in some states (e.g., Massachusetts) is due to a reduction in ...

Solar Installed System Cost Analysis NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ...

Summary: This article explores the growing role of photovoltaic panels across industries, backed by installation data and efficiency trends. Learn how solar adoption is reshaping energy strategies ...

China holds over 35% of worldwide solar market share. The solar energy market is rapidly expanding, transitioning from an alternative energy source to a mainstream power generation ...

Notably, the first community solar projects in Delaware and New Mexico reached completion last quarter, adding 9.8 MWdc and 5.7 MWdc, respectively. We expect national installed ...

As of early 2025, nearly 5 million households (specifically, 4.7 million) have solar panels installed on their rooftops, according to a SolarReviews report. That's about 7% of U.S. homes, and ...

Of the total solar capacity installed in the U.S., over 26 percent corresponds to residential installations. This segment has grown in recent years, reaching some 4.7 million installations in...

This year's report updates key trends related to project characteristics, system design, and pricing, and presents new material relying on building and property data integrated into the ...
