

Since launching service in February 2019, SJCE has invested \$1 billion in nearly 500 MW of solar, wind, and battery storage. The New Mexico Wind Project augments its investments in solar ...

"Our clean electricity is electrifying transportation, homes, and businesses and will improve the health of our community and planet." To date, Clean Energy has invested more than \$1 ...

"Our clean electricity is electrifying transportation, homes, and ...

SJCE has also kept nearly five million metric tons of greenhouse gas emissions out of the air thanks to a wide range of clean energy sources including solar, wind, battery storage, and geothermal power.

Since launching in 2019, SJCE has contracted over \$2.5B for over 900 MW of new renewable energy and reliability resources, including solar, wind, geothermal, and short and long duration battery storage

The New Mexico Wind Project augments its investments in solar and battery storage and diversifies its portfolio. Wind complements solar generation and typically delivers power around the ...

To date, SJCE has invested more than \$1 billion to add new solar, wind, and battery storage to the grid at cost-effective prices for customers.

Since launching in 2019, SJCE has contracted for over one gigawatt of renewable energy including solar, wind, battery storage, and geothermal power, and kept nearly five million metric tons ...

On February 2, 2022, SJCE and developer Terra-Gen announced the completion of an innovative solar and battery storage project that is delivering energy to SJCE customers in a unique format: fixed ...

This article explores the plant's location, technical specs, and why it matters for the clean energy transition--perfect for investors, policymakers, and industry professionals seeking actionable insights.

Our first investment in wind energy completed construction and is producing power. Wind produces power around the clock, but especially overnight, complementing our investments in solar and ...
