

Building a microgrid is more appealing and more doable than ever before. Solar-plus-battery microgrids (unlike generators) are not susceptible to the fossil supply chain issues that hit ...

Block Energy plans to break ground on the Florida solar microgrid community next year, with Highland Homes beginning construction in 2025.

Starting October 2, 2024, eligible communities can submit proposals for technical assistance and funding to support the design and implementation of a microgrid project, or to optimize existing ...

The exchange offers a library of data and resources, peer-to-peer exchanges, and trainings and workshops. Anyone interested in microgrids, including vendors, energy providers, researchers, ...

Military bases, hospitals, fire stations and other critical service providers have been turning to solar-plus-storage microgrids for years, and for good reason. They know that in an outage,...

A BlockEnergy installation in Florida, approved as a pilot project by the Florida Public Service Commission, is an example of a community microgrid that already has proved its worth.

This year's event will dive into the urgency of fractionalized energy systems, the growing impact of grid-edge technologies, and how microgrids are redefining energy independence in real time.

In Florida, both Florida Power & Light (FPL) and Tampa Electric are partnering on microgrid projects. FPL, which describes itself as the largest energy company in the US as measured by retail electricity ...

Florida public power utility OUC is collaborating with Capacitech Energy in a microgrid project to demonstrate Capacitech Energy's largest deployment to date of the PowerLink, a cable ...

In Florida, a 37-home subdivision with a community solar microgrid was able to maintain access to power despite outages elsewhere in the area. An energy expert has explained just how ...
