

Demand for new energy vehicles is growing rapidly, boosting demand for battery anode materials, which will likely continue to climb in the second half of this year, Shanshan said in its ...

On August 15, CORNEX New Energy and Ningbo Shanshan Co., Ltd. signed a strategic cooperation agreement at CORNEX's global headquarters. The agreement was signed by Zhu ...

Our strategic partnership with a renowned and highly knowledgeable Chinese Graphite leader like Shanshan is essential for building out Europe's battery value chain.

Products from the Pilot Plant, which is expected to be operational in H2 2025, will be shared with Shanshan's existing clients as well as potential new customers to facilitate the ...

These workshops will produce various specifications of artificial graphite anode materials for lithium-ion batteries, applicable for new energy vehicles and energy storage batteries. The main customers ...

A new strategic partnership has been established between Shanghai Shanshan Tech Co., Ltd, the world's largest producer of synthetic graphite anodes, and Imerys to build a localised supply chain...

This strategic collaboration will focus on the joint development of energy storage systems, the application of next-generation battery materials, the commercialization of energy storage ...

(Yicai Global) Oct. 18 -- Shanshan, a major Chinese producer of battery materials, said it plans to raise as much as CNY6 billion (USD834 million) from a private placement of shares to finance an ...

Shanshan launched a strategic transformation towards the new energy industry in 1999. Started with anode materials, and later expanded into cathode materials and electrolytes, Shanshan has ...

The China New Energy Storage Development Report 2025 represents a major milestone in the institutionalization of NES planning and governance in China. By quantifying progress and ...
