

What sets the Soleolico wind turbine apart is not just its ability to generate wind energy, but its integration of solar panels into the turbine blades. This dual-capacity generation system ...

A Swiss startup is using reclaimed wind turbine blades instead of metal beams as horizontal supports for solar panels. Founded in 2022, Turn2Sun is based in Neuchâtel and calls its ...

Wind turbine blades have a reasonable surface area and extra power from solar panels mounted on them could easily be transmitted to the grid via existing wind farm infrastructure. But even so, the ...

This unique technology combines the forces of wind and solar energy into a single system, making it the world's first wind turbine with photovoltaic panels integrated into its blades.

On October 6, 2023, energy company Soleolico unveiled the world's first wind turbine equipped with photovoltaic panels mounted on rotating blades, aptly named "sails.". This innovative ...

Last week at the Palacio de la Magdalena in Santander, energy company Soleolico introduced what it calls the world's first wind turbine with photovoltaic panels anchored on rotating blades that capture ...

In an age of finding creative ways to recycle end-of-life products, a Swiss startup is using retired wind turbine blades as solar panel support beams.

On October 6th, at the Palacio de la Magdalena in Santander, energy company Soleolico introduced what it calls the world's first wind turbine with photovoltaic panels anchored on rotating...

Spanish startup Soleolico, unveiled their wind turbine in Santander, Spain (6th Oct 2023) which merges wind and solar energy by incorporating photovoltaic panels into its blades, aiming for ...

Soleolico is the world's first wind turbine that integrates photovoltaic panels into its blades. It presents a disruptive technology with international patents that combines wind, solar, and storage ...
