

How do I install a photovoltaic system?

Follow along with the essential steps of photovoltaic systems installation, from mounting solar modules and connecting to the grid, to commissioning and regular maintenance for optimal performance.

How to install a solar power system?

When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit. Before Installation, take care of any obstructions to sunlight. Remove all unnecessary obstructions and items such as branches that may block sunlight to your solar unit.

What are the components of a solar photovoltaic system installation?

Let's get started! There are the main components of a solar photovoltaic system installation: Solar panels(photovoltaic modules) are the heart of any solar system installation. These panels convert sunlight directly into electricity and are typically made up of a series of interconnected silicon cells.

Where should a solar panel be installed?

It is very important to install your solar panel at location that gets the most direct sun exposure. Solar Panels perform at optimum capacity when placed in direct sunlight. When you install your Solar Power system,try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit.
