

More than 720 senior government officials, industry experts, and corporate elites from across the country gathered at this grand event to jointly explore the future blueprint of the solar ...

Not far from Las Vegas, the Crescent Dunes solar power plant looks like something from a sci-fi flick. But it's actually a real-world billion-dollar megaproject, completed in 2015 with the goal...

The facility uses more than 170,000 devices called heliostats, each consisting of two mirrors that direct solar energy onto boilers found on the three centralised solar power towers.

The Dunhuang 100-megawatt power plant stands out as the world's tallest and largest in terms of light-gathering capacity. It features over 12,000 mirrors that concentrate sunlight onto a ...

This is amazing energy revolution in the Gobi Desert of China whereby thousands of perfectly spaced mirrors produce a spectacular show of concentrated solar energy.

Built and operated by Shouhang Hi-Tech Energy Technology Co., Ltd. on the vast Gobi Desert, it is China's largest constructed concentrated solar-thermal power plant using molten salt, ...

The "Super Mirror" project is like a huge solar mirror, which not only reflects the sun's rays, but also reflects China's wisdom and strength. It is a sharp weapon for mankind to fight against ...

This super mirror power station, built by Shouhang High-Tech Energy, spans 780 hectares, equivalent to over 1,000 standard soccer fields.

In China, the pioneering next-generation mirror-solar power station has been officially launched in the Gansu Province. Thirty thousand mirrors direct sunlight onto towering 200-meter ...

SHOUHANG|Power Plant Air Cooling System|solar thermal power generation A high-tech enterprise engaged in R & D, design, manufacturing, sales, installation, management, commissioning.
