

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

"This project helps to stabilize the electricity grid in Switzerland and to optimize the management of our own energy and power capacity in Wetztingen", he states. Both projects are being operated under the ...

In Energy Vault's second deployment, it will supply Energie Wetztingen, an independent public utility northwest of Zurich, with an 8 MW / 16 MWh B-VAULT FlexGrid system designed for stacked, high ...

So there you have it - Switzerland's energy storage landscape in 2025 isn't just about electrons in boxes. It's a wild ride of innovation where precision engineering meets environmental urgency.

From temporary worksites to renewable farms, Swiss mobile energy storage power supply vehicles provide adaptable, sustainable power solutions. As energy demands evolve, these systems will play crucial roles in ...

In a Swiss valley, an unusual multi-armed crane lifts two 35-ton concrete blocks high into the air. The blocks delicately inch their way up the blue steel frame of the crane, where they hang...

Its main task is the safe and reliable supply of Wetztingen with electricity and drinking water. It supplies more than 13,000 customers in Wetztingen. It is deeply rooted in the region.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's largest.

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies such as compressed air and ...

Battery energy storage PCS solution for EKZ, one of Switzerland's largest energy companies BESS 1 MW / 250 kWh PCS solution at the Dietikon Power Plant in Zurich, Switzerland.
