

With a 9MWh capacity per unit, it can charge approximately 150 electric vehicles or power a typical German household for six years, enhancing efficiency for large-scale applications. The system's high ...

With a capacity of 9MWh, it can charge 150 electric vehicles or power a German household for six years. The system supports both centralized and string PCS (Power Conversion System) architectures, ...

On May 7, CATL unveiled TENER Stack, the world's first mass-produced 9MWh ultra-large-capacity energy storage system solution, at the Battery Energy Storage Exhibition in Munich, Germany.

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry benchmark with its ...

At the exhibition, the company unveiled its all-in-one AC/DC energy storage system for the first time overseas. Featuring compact integration and smart APP controls, it enhances installation flexibility and ...

Today, the company unveiled a 20-foot-tall energy storage system (ESS) called the TENER Stack, which, according to CATL, offers breakthroughs in storage capacity, deployment flexibility,...

On the first day of the Smarter E show in Munich, CATL, the world's largest battery manufacturer, unveiled the TENER Stack, which it describes as the world's first 9 MWh ultra-large-capacity energy storage ...

"To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.

On the first day of the Smarter E show in Munich, CATL, the world's largest battery manufacturer, unveiled the TENER Stack, which it describes as the world's first 9 MWh...
